Portfolio | GitHub | DOB: 11 August 2005

Summary

Computer Science Engineering student and AI/ML intern with experience building **full-stack applications, REST APIs, database-driven systems, and AI-enabled workflows**. Skilled in **Java, Python, JavaScript, React.js, Node.js, MongoDB, problem solving, and software development fundamentals**.

Education

PSG Institute of Technology and Applied Research, Coimbatore — **2023 – Present**
B.E. Computer Science and Engineering — ***CGPA: 6.55 / 10***

Keins Matric Higher Secondary School, Tirunelveli — **2022 – 2023**
Higher Secondary Education — ***92.5%***

Experience

SynecX AI Labs — **2026 – Present**
AI/ML Intern — *Coimbatore*

- Developed **ReconIQ**, a full-stack financial reconciliation platform integrating document processing, transaction comparison, discrepancy detection, fraud-risk analysis, and automated report generation.
- Implemented **6+ verification workflows**, including transaction normalization, validation, duplicate detection, balance verification, suspicious-record identification, and mismatch analysis.
- Designed a **layered software architecture** connecting the **frontend, REST APIs, backend services, database, AI analysis engine, and report-generation module**.

Projects

Restaurant Booking and Management Platform *React, Node.js, Express.js, MongoDB, JWT, REST APIs* |

- Developed a **full-stack restaurant booking platform Quickdine** that allows customers to browse restaurants, check table availability, make reservations, and manage their bookings.
- Implemented **JWT authentication and role-based authorization** for customers, restaurant owners, and administrators.
- Built **restaurant, table, reservation, menu, and order management** features using REST APIs, MongoDB, reusable React components, and responsive interfaces.

AI Meeting-to-Execution Agent *React, Flask, LangGraph, LangChain, MongoDB, n8n* |

- Developed a **full-stack meeting productivity platform** that converts meeting content into summaries, decisions, action items, task owners, and deadlines.
- Built **AI-driven workflows and interactive dashboards** for meeting analysis, task assignment, responsibility tracking, and execution monitoring.
- Integrated REST APIs, MongoDB, LangGraph, LangChain, and **4 automated n8n workflows** for email extraction, task generation, Google Sheets updates, and team notifications.

MindCare – Mental Wellness Support Platform *React, Flask, MongoDB, REST APIs, ML* |

- Developed a **full-stack mental wellness platform** with user registration, secure login, assessments, personalized activities, and progress-tracking features.
- Implemented questionnaire processing and an **ML classification workflow** with three wellness support levels: mild, moderate, and high.
- Added **mood tracking, assessment history, streaks, personalized recommendations, progress monitoring, and interactive dashboards**.

Technical Skills

- **Programming Languages:** Java, Python, C++, C, JavaScript
- **Frontend and Backend:** HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, Flask, REST APIs
- **AI and Automation:** Machine Learning, LangGraph, LangChain, LLMs, n8n
- **Databases and Authentication:** MongoDB, MySQL, JWT Authentication
- **Tools and Deployment:** Git, GitHub, Postman, Vercel, Render

Area of Interest

- Operating Systems
- Computer Networks
- Database Management Systems
- Software Development
- Web Development

Soft Skills

Languages: English, Tamil
Skills: Communication, Problem Solving, Adaptability, Leadership, Teamwork, and Collaboration
Leadership: Team Coordination
Hobby: Reading Books

Current Focus

- Data Structures and Algorithms
- CyberSecurity
- Agentic AI
